## Tasting notes:

Enjoy your wine and put your thoughts about the tasting "on paper". **DataVino®** offers you comfortable input masks. Preserve your own tasting results for all periods. You evaluate your tasting with the help of the program in a 20-point system. But do not forget:

**Only your taste decide!**

## Online updates:

Get free online updates of intermediate versions (1.x) and update the master data of the wine knowledge database via Internet.

## Countries and regions:

The integrated background content of **DataVino®**, created by renowned partners, inform you about wine-growing regions, grape varieties, wine producers and wine suppliers. The master database contains approximately:  
48 Countries  
225 Regions  
1840 Sub regions.

## Grapes:

About 350 grape varieties are integrated, some with pictures and descriptions.

## Vintners and wine merchants:

Enjoy the included master database. It will be extended by the editors of **DataVino®** continuously. Updates can be downloaded via Internet. You could also add your own wine growers and dealers to your database.

## Entry into master database:

You like to appear as a wine producer or wine merchants in the master database of **DataVino®**? Use the form below:
